

AUDIOLOGY & SPEECH PATHOLOGY

tpte.utk.edu

ABOUT THE MAJOR

Audiology

Audiologists are health care professionals who identify, assess, and provide patient care through evidence based treatment of hearing, balance or other auditory disorders to children or adults across an entire age span. Audiologists prevent hearing loss through the provision and fitting of hearing protective devices, consultation and the effect of noise on hearing, and consumer education.

Speech Pathology

Speech pathologists treat speech and language disorders and work with individuals of all ages, from infants to the elderly. They diagnose and evaluate speech problems, such as fluency (e.g. stuttering), articulation, voice disorders, or language problems, such as aphasia and delayed language and related disorders such dysphagia (e.g. swallowing difficulties).

*Audiology & Speech
Pathology majors must
maintain a 3.0
cumulative GPA.*
